

ABSTRACT OF THE DISCLOSURE

1 An housing is configured for connection to the raceway panels by removing
the concrete above the raceway panel, cutting a hole in the raceway panel, and
securing the housing in the hole in the raceway panel. Alignment clips allow the
5 afterset housings to be ganged together to form an integral afterset assembly. Each
alignment clip is configured to slidably engage with a pair of the afterset housings.
In one embodiment, the afterset housing ^{includes} ~~comprises~~ a preset housing that is normally
configured for connection to the raceway panel prior to pouring of the concrete
floor, and an adapter connectable to the preset housing and being constructed to
10 ^{reconfigure} ~~reconfiguring~~ the preset for use as an afterset housing which is adapted for
connection to the raceway panel following pouring of the concrete floor.
